

# Risk Management Policy and Procedures

## Scope

This policy applies to all employees, contractors and visitors at any Bounce Fitness Centre.

## Policy Statement:

- The company recognizes the need for risk management in consideration to day-to-day operations, strategic and operational planning and decision making in all levels in the organisation.
- The company is committed to managing and minimising risks by identifying, analysing, evaluating and treating threats to achieving the goals of the organisation.
- Company staff will implement risk management in accordance to relevant legislative requirement and appropriate risk management standards.
- The company is committed to ensuring that all staff, most especially those with managerial duties, obtain a clear understanding of the principles of risk management and the requisite skills to implement risk management effectively.
- Risks that must be addressed by recruitment, efficiency and organizational development measures must be forwarded to the Site Manager. Risks that must be addressed by staff training and customer relations must be forwarded to the Administration Manager. Tasks that may be addressed by equipment maintenance must be forwarded to the Project Manager. Risks beyond this scope will be addressed directly to the Site Manager for evaluation.
- To maintain order and reduce confusion, all must be addressed by the appropriate personnel assigned to it.

## Procedures

- All employees are obligated to comply with the work health and safety policies, procedures and instructions to ensure a safe workplace for all.
- The Site Manager and if applicable, the Project Manager, delegate responsibilities for the management of workplace health and safety
- All individuals have an obligation to guard against or protect other from any hazards or incidents as soon as they are recognised. If the hazards or incidents are cannot be rectified immediately, the person must report the hazards or incidents to the Site Manager or Projectt Manager.

A Reportable Risk to the Company includes:

### Risk assessment

The company follows the systematic examination of any location or operational system in order to control hazard and manage risk: The risk assessment follow enables an individual to:

- Identify risks
- Evaluate and Analyse the likelihood and potential consequences of the risks
- Review the current or planned approaches to controlling the risks
- Add control measures where required

The company follows these steps in ensuring that all risks are properly identified, analysed, evaluated, treated and monitored:

1. **Establishing the Context** – The company considers the nature of the risks that when identifying and managing risks associated with the achievement of strategic and operational objectives.
2. **Risk Assessment** - The overall process of risk identification, risk analysis and risk evaluation.
3. **Risk Identification** – Identifying risk sources, areas of impacts, causes and possible consequences to form a comprehensive list of risks that will negatively or positively affect the organisation's objectives.
4. **Risk Analysis** - Considering the range of causes, sources of risk, consequences and likelihood to produce a risk rating. The rating will be used to determine the proper steps in treating these risks.
5. **Risk Evaluation** - The level of risk identified during risk analysis can be ranked and prioritised according to a consistent overall ranking and rating system.

6. **Communicate and Consult** - Effective communication, consultation and education in risk management are necessary to achieve a successful integration of the risk processes into the business.
7. **Risk treatment** – Selecting one or more options for modifying risks including funding and other resource considerations.
8. **Monitoring and review** - Continual monitoring and reviewing of risk profiles is essential to maintain the effectiveness and appropriateness of the treatment plans applied by management

#### **Treating Risks**

1. Risks shall be assessed by the Site Manager or the Project Manager
2. Risks control measures will be decided by the person assessing the risks, with confirmation from the Site Manger.
3. The risks must be addressed by the appropriate personnel with jurisdiction over the nature of the risk.
4. Risks and their respective treatment plane must be forwarded to the relevant personnel via email. The relevant personnel will be in charge of resolving the risk given the treatment plans.

#### **Auditing**

To maintain effectiveness and appropriateness of the treatment plans applied, various auditing tools are used by the company to continually improve treating risks.

**Risk Reviews:** After the implementation and monitoring of risks, the centre manager must conduct a review of areas that require improvement to maintain the effectiveness of the control measures.

**Continuous Improvement Log:** All risks are logged onto a continuous improvement table so that further recommendation and changes can be implemented for each risk.
